Empower your team

Spectra Optia™ Apheresis System new operator, refresher, and advanced operator training.

Every procedure performed is for a patient in need, so you cannot afford to compromise on training. Whether this involves onboarding new staff or providing refresher training for existing teams, you need to ensure that procedures are carried out with the highest level of proficiency and care. Maintaining the competence and confidence of your team is an important way to enhance their job satisfaction and increase retention.

Terumo Blood and Cell Technologies offers expertise based on more than 40 years of therapeutic apheresis and cell collection experience. Our industry-leading professional education program helps blood centers and hospitals, as well as research, biotech/pharma, and third-party collection organizations, acquire and refine procedural skills and push the boundaries of their efficiencies.

Our training combines theoretical context, practical use, best practices, and hands-on exercises to refine procedural skills and maximize operational efficiencies.

Through our Veda™ Skills offering, we are pleased to introduce these training options:

- **New Operator:** In healthcare environments across the globe, staff fluctuation is a reality that requires constant training. This training is designed to help new team members become confident and productive as soon as possible.
- **Refresher:** These modules are specifically designed to refresh existing staff. To keep competency high, training options are available for troubleshooting, skill reinforcement, and advanced training.
- **Successions:** During this in-person training, apheresis professionals can take their Spectra Optia knowledge to the next level with in-depth procedural discussions, case study reviews, troubleshooting guidance, and peer networking. Available for select product lines.
- **Train the Trainer:** Classes that allow your designated team members to become in-house experts who can train others. Available for selected product lines.

Procedures offered

- Therapeutic plasma exchange (TPE)
 - TPE with single-needle access
- TPE with a secondary plasma device (TPE-SPD)
- Red blood cell exchange (RBCX)
 - Red blood cell depletion
 - Depletion/exchange
 - RBCX with single-needle access
- Continuous mononuclear cell collection (CMNC)
- Mononuclear cell collection (MNC)
- Granulocyte collection (PMN)
- Bone marrow processing (BMP)
- White blood cell depletion (WBCD)
- Platelet depletion (PLTD)

Spectra Optia system user training

- Conveniently delivered at your site or virtually
- Available in one-, two-, or three-day options
- Mix of lecture and hands-on device time
- Delivered by Terumo Blood and Cell Technologies certified experts

Veda Skills courses are rooted in our extensive experience in therapeutic apheresis and cell collections.
